

Optimize Your Protection with ClearX HD

ClearX HD is an advanced polymer treatment from Madico that is an essential part of the maintenance program for ClearPlex Windshield Protection Film. ClearX HD will maintain the scratch resistance and water repellency of ClearPlex on your windshield when it is used as directed. It also seals your ClearPlex film against bird droppings, bugs, oil, tar, grease, dirt, and grime.

The Best Windshield Protection You'll Never See

Driving on today's highways can be hazardous—especially to your windshield. From small rocks to road debris, unwanted objects that strike your glass can lead to serious, costly damages and driving distractions.

Now you can safeguard your vehicles and investment with ClearPlex® Windshield Protection Film. ClearPlex is the world's first optically-clear protection film for vehicle windshields. Made and distributed by Madico®, it absorbs the impact of standard road hazards, significantly reducing the occurrence of rock chips, stars, pitting, and bull's-eyes—leaving the glass in pristine condition.

In addition, ClearPlex is guaranteed not to peel, bubble, crack, or yellow for the warrantied life of the film. Ideal for luxury and classic cars, fleets, recreational vehicles and construction equipment, it's a whole new vision in windshield protection.

Impact & Scratch Resistant

Whatever the road dishes out, ClearPlex was designed to take it—even up to 120 mph. Its patented hard coat is scratch resistant and provides qualities similar to glass, including protection against normal scratches and abrasions.

Protects Interiors & Occupants

ClearPlex film protects a vehicle's interior and its occupants against 99.9% of the sun's harmful UV rays. So, you'll stay cooler and enjoy more protection.

A Clear Choice

ClearPlex offers faster run-off of rain and snow resulting in better visibility. It's optically clear so it won't impair your vision and seamlessly integrates with your windshield. The film is thermally fitted to every curve of the windshield, forming a bond with the glass that ensures optical clarity. You may not see it, but you'll feel better knowing it's there.

Protection and Peace of Mind

Windshields contribute to a vehicle's structural integrity during a front-end collision and rollover. ClearPlex film can help keep a windshield intact during an accident and prevent the vehicle's roof from collapsing in a rollover. An intact windshield can also help to keep passengers inside the car. Helping preserve windshields in an accident protects the vehicle's occupants as well as the vehicle itself.
